EDUCATION

KIT, College of Engineering

B.Tech in Computer Science and Engineering

CGPA: 8.5+

Kolhapur, Maharashtra

Expected Graduation, June 2027

PROFILE SUMMARY

Computer Science Engineering student with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, PostgreSQL, and MongoDB. Strong foundation in Data Structures & Algorithms with 400+ coding problems solved. Experienced in designing REST APIs, database-driven applications, authentication systems, and scalable web platforms. Passionate about modern web development, AI-powered applications, and software engineering.

TECHNICAL SKILLS

Programming: Java, Python, TypeScript, JavaScript

Data Structures & Algorithms: Arrays, Linked Lists, Trees, Graphs, Dynamic Programming

Frontend Development: HTML5, CSS3, [React.js](#), Next.js, Tailwind CSS

Backend Development: [Node.js](#), [Express.js](#), REST APIs, JWT Authentication

Database: PostgreSQL, MongoDB, Prisma ORM

Tools: Git, GitHub, VS Code, Postman, Vercel

PROJECTS

College Compass

Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS

- Built a full-stack college discovery platform using Next.js, TypeScript, PostgreSQL, Prisma, and Tailwind CSS.
- Implemented authentication, college comparison, and saved colleges functionality.
- Developed REST APIs and integrated database-driven search and filtering.
- Deployed the application on Vercel.

[GitHub Repository](#) | [Live Demo](#)

University Sports Department Management System

Tech Stack: React.js, Node.js, Express.js, PostgreSQL

- Developed a web-based platform for managing university sports activities and player records.
- Implemented role-based access control for Students, Admins, and Super Admins.
- Built modules for player registration, document verification, eligibility tracking, and competition management.
- Created RESTful APIs and integrated PostgreSQL for efficient storage and management of student data.

Inventory Management System

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack inventory management application for tracking products and stock information.
- Implemented CRUD operations for inventory items, categories, and stock records.
- Built inventory monitoring features to manage stock availability and product updates.
- Integrated REST APIs with MongoDB for efficient data storage and retrieval.

ACHIEVEMENTS

- Solved **400+** coding problems across LeetCode and GeeksforGeeks.
- Built **3+** full-stack applications using React, Node.js, and PostgreSQL.
- Maintained projects using Git and GitHub version control.

INTERESTS

- Full Stack Web Development
